

HOUSE OF MIRACLE DETAIL

The project is based on three main functions: a residence, an exclusive polish workshop and a car-exhibition hall.

“House of Miracle Detail” contains two main parts. The part facing the neighbour building, is shaped as a strict rectangular shape, while the other part is shaped by organic lines, inspired of the car design, particularly the design of some different Lamborghini models.

THE WORKSHOP
PLAN SECOND

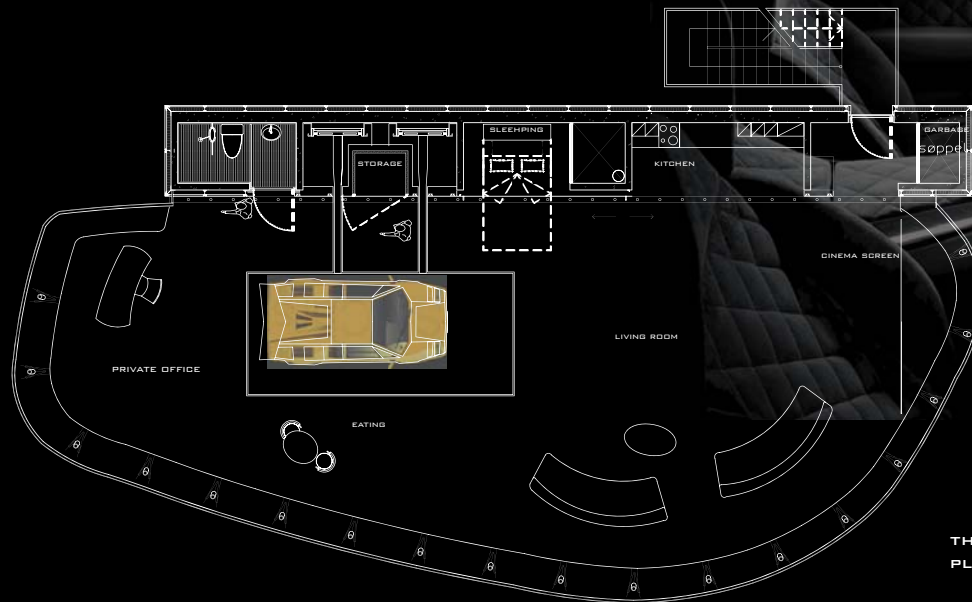

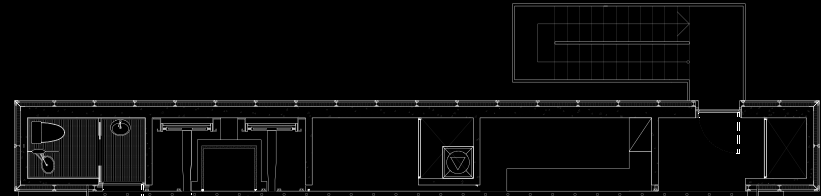

His service is exclusive and his time is expensive. He is not an amateur valet with a bucket, sponge and vacuum cleaner. He doesn't work for a large company, dreaming of ways to cut corners or return maximum results for minimum effort.

But he is the best, and miracles never come cheap.

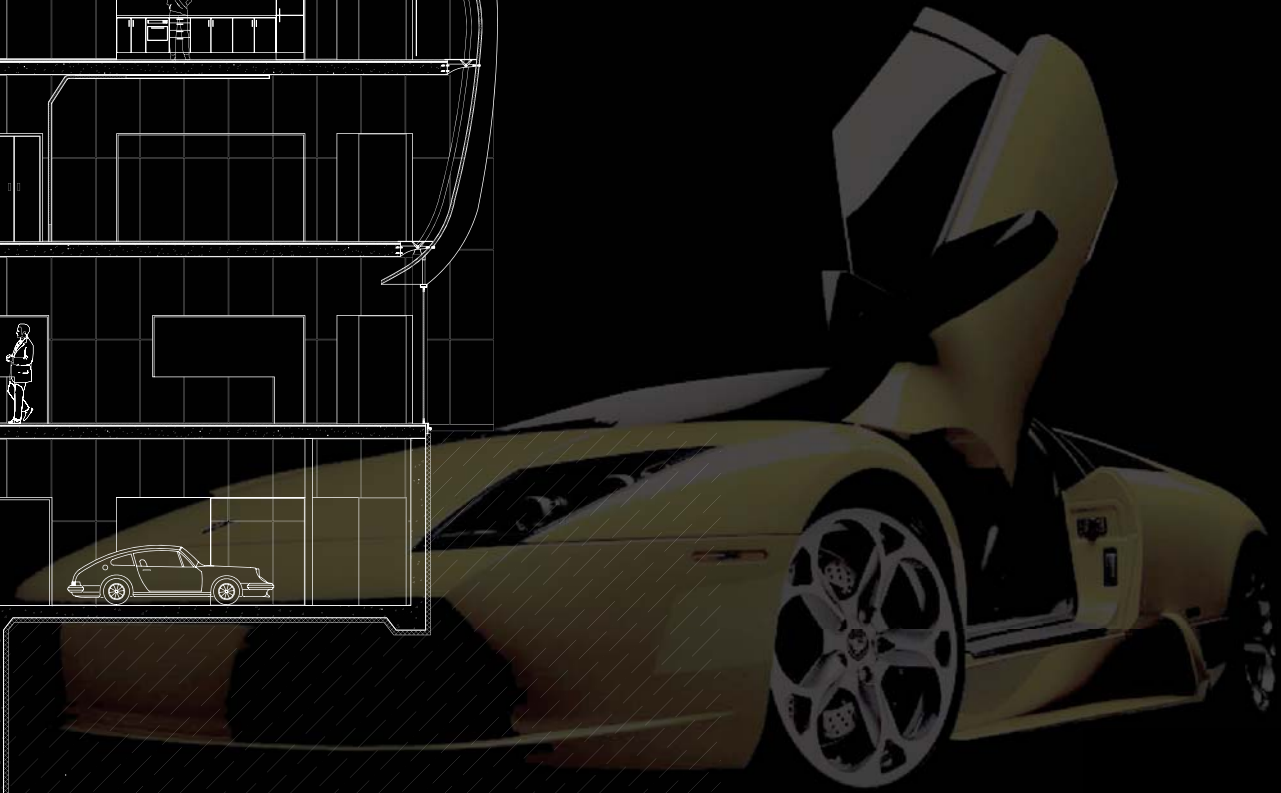

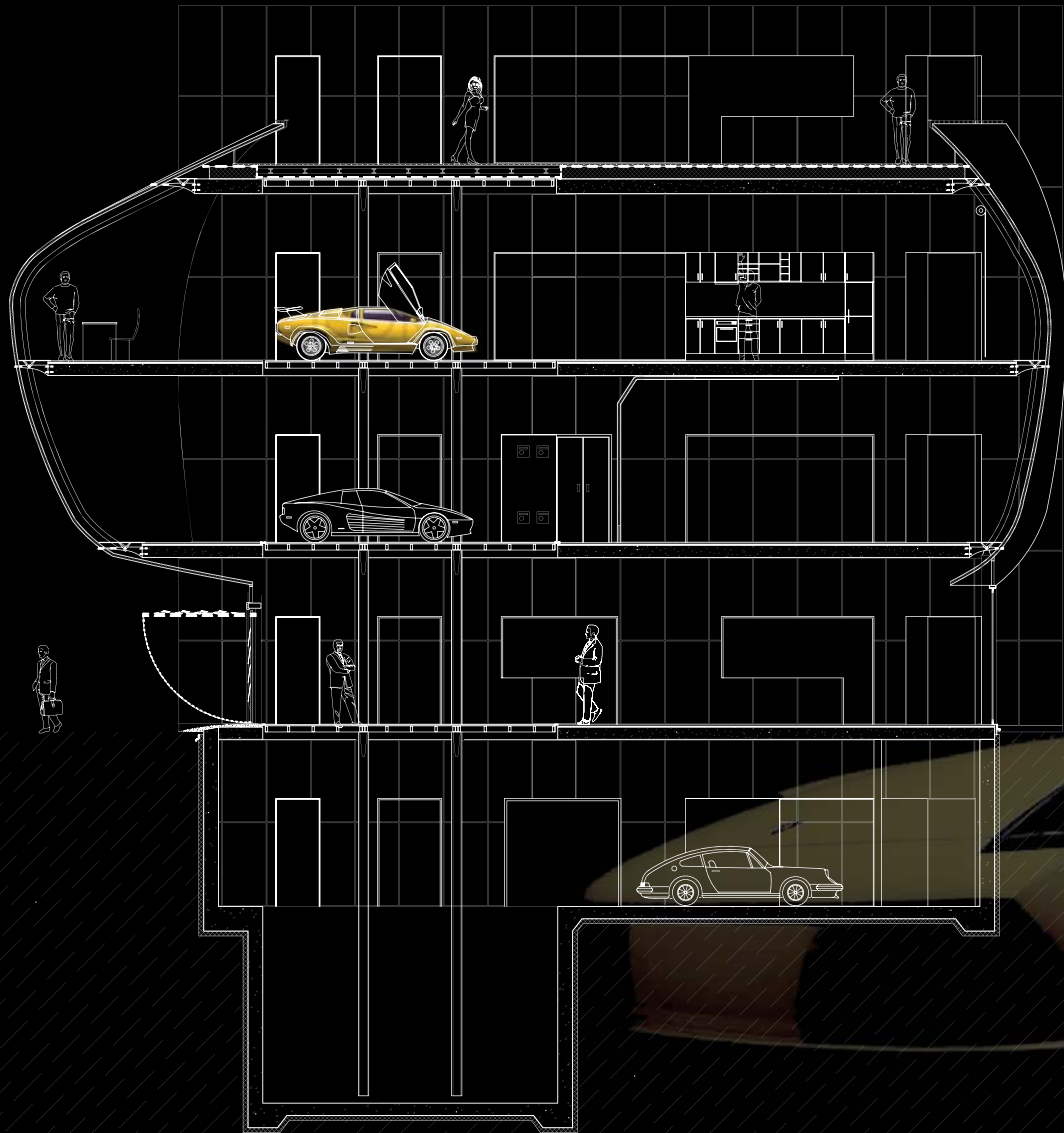

Paul Dalton works alone, because he is a perfectionist, and he cannot trust anyone else to detail a car with his care, skill or enthusiasm.
